

Finanstilsynet's XBRL Filing Manual for CRD-IV

1. Introduction

This document assists the reporting entities to create XBRL instance documents for CRD-IV. This is because of fact that XBRL is a broad language, and it is necessary to make some decisions to ensure that the pattern of a XBRL instance document is similar across entities using different tools/vendors to produce XBRL instance documents.

2. Purpose and Scope

This document provides Norway-specific rules to create XBRL instance documents for CRD-IV reporting. **These rules are in addition to the EBA Filing Rules that MUST be adhered to.** The rules in this document further clarify or constrain the EBA Filing Rules.

The scope of this document only addresses the concerns to create XBRL instance documents for CRD-IV and does not apply to other XBRL and NON-XBRL reporting obligations from Finanstilsynet.

The document is intended for use by reporting entities and XBRL vendors involved in preparation of XBRL instance documents. Further information on reporting format and related material from EBA can be found [here](#).

3. Filing Syntax Rules

Filing Naming

File extension MUST be either *xbrl* or *zip*

NB: XBRL instance document MUST be zipped in case size of the document is >10 MB

Taxonomy Extensions

Finanstilsynet will not extend EBA taxonomy and therefore reporting entities MUST use the same taxonomy (as is) that is published by EBA for a given period. This is necessary to harmonize the CRD-IV reporting across Europe.

Filing Indicators:

Each reported fact in a XBRL report corresponds to one or more reporting units known as "templates".

From reference date 31st December 2020, XBRL reports **MUST** provide filing indicator elements (positive and/or negative) **for all reporting unit** ("template") defined in the reporting module to which the XBRL report refers.

It means “**missing filing indicators**” are no longer permitted. In other words, XBRL reports MUST include appropriate negative filing indicator elements (instead of saying nothing /"missing filing indicator") to express which reporting units (“templates”) are intended NOT to be reported.

Example of a **positive** filing indicator (can define with or without attribute:

`find:filed="true"`):

```
<find:filingIndicator contextRef="c-1">C_28.00</find:filingIndicator>
```

```
<find:filingIndicator contextRef="c-1" find:filed="true">C_28.00</find:filingIndicator>
```

Example of a **negative** filing indicator:

```
<find:filingIndicator contextRef="c-1" find:filed="false">C_09.01</find:filingIndicator>
```

You can find more examples of filing indicators in a XBRL report in Annex-I below.

More information on **Templates categorization** (like **mandatory**, **master data dependent**, **activity/threshold-based** templates etc.) can be found her (Excel file):

<https://www.eba.europa.eu/risk-analysis-and-data/reporting-by-authorities>

Furthermore, a XBRL report MUST NOT include facts which are not contained in any of the templates indicated by the filing indicators (ref. EBA filing rule 1.7.1).

Instance Validation

Finanstilsynet will run XBRL validation and formula (Business Rules) validation specified by EBA using CRD-IV taxonomy for a given period. All instance documents MUST be valid accordingly.

Business Rules provided with XBRL taxonomy (using XBRL formula) are the minimum set of rules which are required to be abided by reporting entities. Cross Validation Rules will be run at Finanstilsynet/EBA premises and in case of errors, Finanstilsynet may ask the relevant reporting entity to make correction(s) and resubmit.

Taxonomy entry point:

An instance MUST refer to single, pre-defined “module” entry points via `link:schemaRef` element (see below *Annex-II*).

```
<link:schemaRef xlink:href="http://www.eba.europa.eu/eu/fr/xbrl/crr/fws/corep/its-2014-05/2015-02-16/mod/corep_lcr_con.xsd" xlink:type="simple"/>
```

Please note the different entry points for consolidated (**con**) and individual (**ind**) modules. To find a schemaRef for a given reference date (instant), the reference date MUST fall within *Valid from Date* and *Valid to Date* as shown in the *Annex-II* below.

Footnotes

Footnotes SHOULD NOT be used for any XBRL elements.

4. Instance/Context Related Rules

Identification of the Reporting Entity

The `xbrli:identifier` element MUST be populated as follow:

```
<xbrli:identifier scheme="SC">organization number</xbrli:identifier>
```

where organization number (organisasjonsnummer) is a 9-digits code of the reporting entity provided by *Brønnøysund Register Centre*.

A single organization number MUST be used throughout the instance.

Reporting Period

Reporting period MUST be the last day of a given reporting period. It is also called as reference date:

```
<xbrli:period>  
  <xbrli:instant>2018-03-31</xbrli:instant>  
</xbrli:period>
```

No *duration* (startDate/endDate) or *forever* type of period is allowed.

Single Reporting Currency

All reported facts MUST be reported in Norwegian Krone (NOK).

```
<xbrli:unit id="xyz">  
  <xbrli:measure>iso4217:NOK</xbrli:measure>  
</xbrli:unit>
```

In special cases, Finanstilsynet may allow to report in a different base currency (other than NOK) but this must be communicated and agreed by Finanstilsynet in advance.

In general, all monetary values in an instance document must be expressed in the same (“reporting”) currency (base currency) as mentioned above that means values should be converted to base currency.

For some specific data items however, it may be indicated (in the taxonomy/DPM) that the values reported should be expressed in their “*currency of denomination*” (i.e., intrinsic/original currency), and not converted to the reporting currency (valid from taxonomy version 2.4.1). For more detail, see *EBA Filing Rules*, section: *3.1 – Choice of Currency for Monetary facts*

Unused Contexts and Units

An instance document SHOULD NOT contain unused contexts and/or units.

Duplicate Facts and Contexts

An instance document SHOULD NOT contain duplicate facts and/or contexts.

Typed dimensions

While specifying members in case of typed dimension, the member's name SHOULD be uniform and without special characters (including unnecessary spaces) except "/" where and when it's possible.

Decimals representation:

- Monetary values MUST be expressed in units, not in thousands or millions (e.g. NOK: 2,560,561.43 MUST be reported as 2,560,561.43, not as “2561” or any similar). There SHOULD be no truncation, rounding or any change in the original fact value.
- A fact representing rates, percentages or ratios MUST be reported using decimal notation rather than in percentages (e.g., 9.31% must be reported as 0.0931)

Reporting portal

Reporting entities must use: www.altinn.no to send the XBRL instance documents (as an attachment to a web form). Norwegian personal identification number (or D-number) is required to login to www.altinn.no.

Annex-I
